

SS CONTROLS ALCOHOL BREATHALYSER

DT1000 DRUG TESTING MACHINE

The DT1000 is a Saliva-based drug analyser that provides the optimal combination of speed, ease of use, reliability and accuracy. The analyser has been designed for workplace settings and law enforcement. The instrument is capable of working in remote environments, detecting up to five drug classes from a single oral fluid sample.

The Android operating system equips the user with the capability to use multiple functions such as quick tests, large storage, taking photos, printer setup, etc. The large full-colour screen provides excellent visibility in daylight and at night.
